Nursing Home
Registration System

Web and Mobile Based

System Features

The Nursing Home Registration application designed to facilitate the registration process for nursing homes under the Bombay Nursing Home Registration Act of 1949 and the Maharashtra Nursing Home Registration (Amendment) Rules of 2021, particularly for government hospitals. Our application aims to streamline this registration procedure, ensuring the accurate and efficient capture of all essential information.

→ **License Management:**   The application allows applicants to request new licenses, as well as renew existing licenses for clinical establishments within nursing homes.

→ **Application Submission:**   Applicants can submit detailed information, including their personal particulars, nursing home details, infrastructure specifications, staff details, and fee structures for patient services.

→ **Application Tracking:**   The system provides a tracking mechanism, enabling applicants to monitor the status of their application and identify which approval stage it is currently pending at.

→ **Area-Based Routing:**   Depending on the selected area type (e.g., Municipal Council, Municipal Corporation, Rural, or Cantonment), the application is automatically routed to the relevant inspection officer for on-site assessment.

→ **Inspection Process:**   Inspection officers thoroughly review the documents attached to the application to ensure compliance with regulatory norms. They then schedule physical visits to the nursing home premises for further verification.

→ **Certification and Approval:**   Once the inspection officer is satisfied with the scrutiny and verification, they approve the application. Subsequently, it proceeds to the appropriate certifying authorities, such as CS (Chief Secretary), DHO (District Health Officer), and MO (Medical Officer), for final verification and approval..
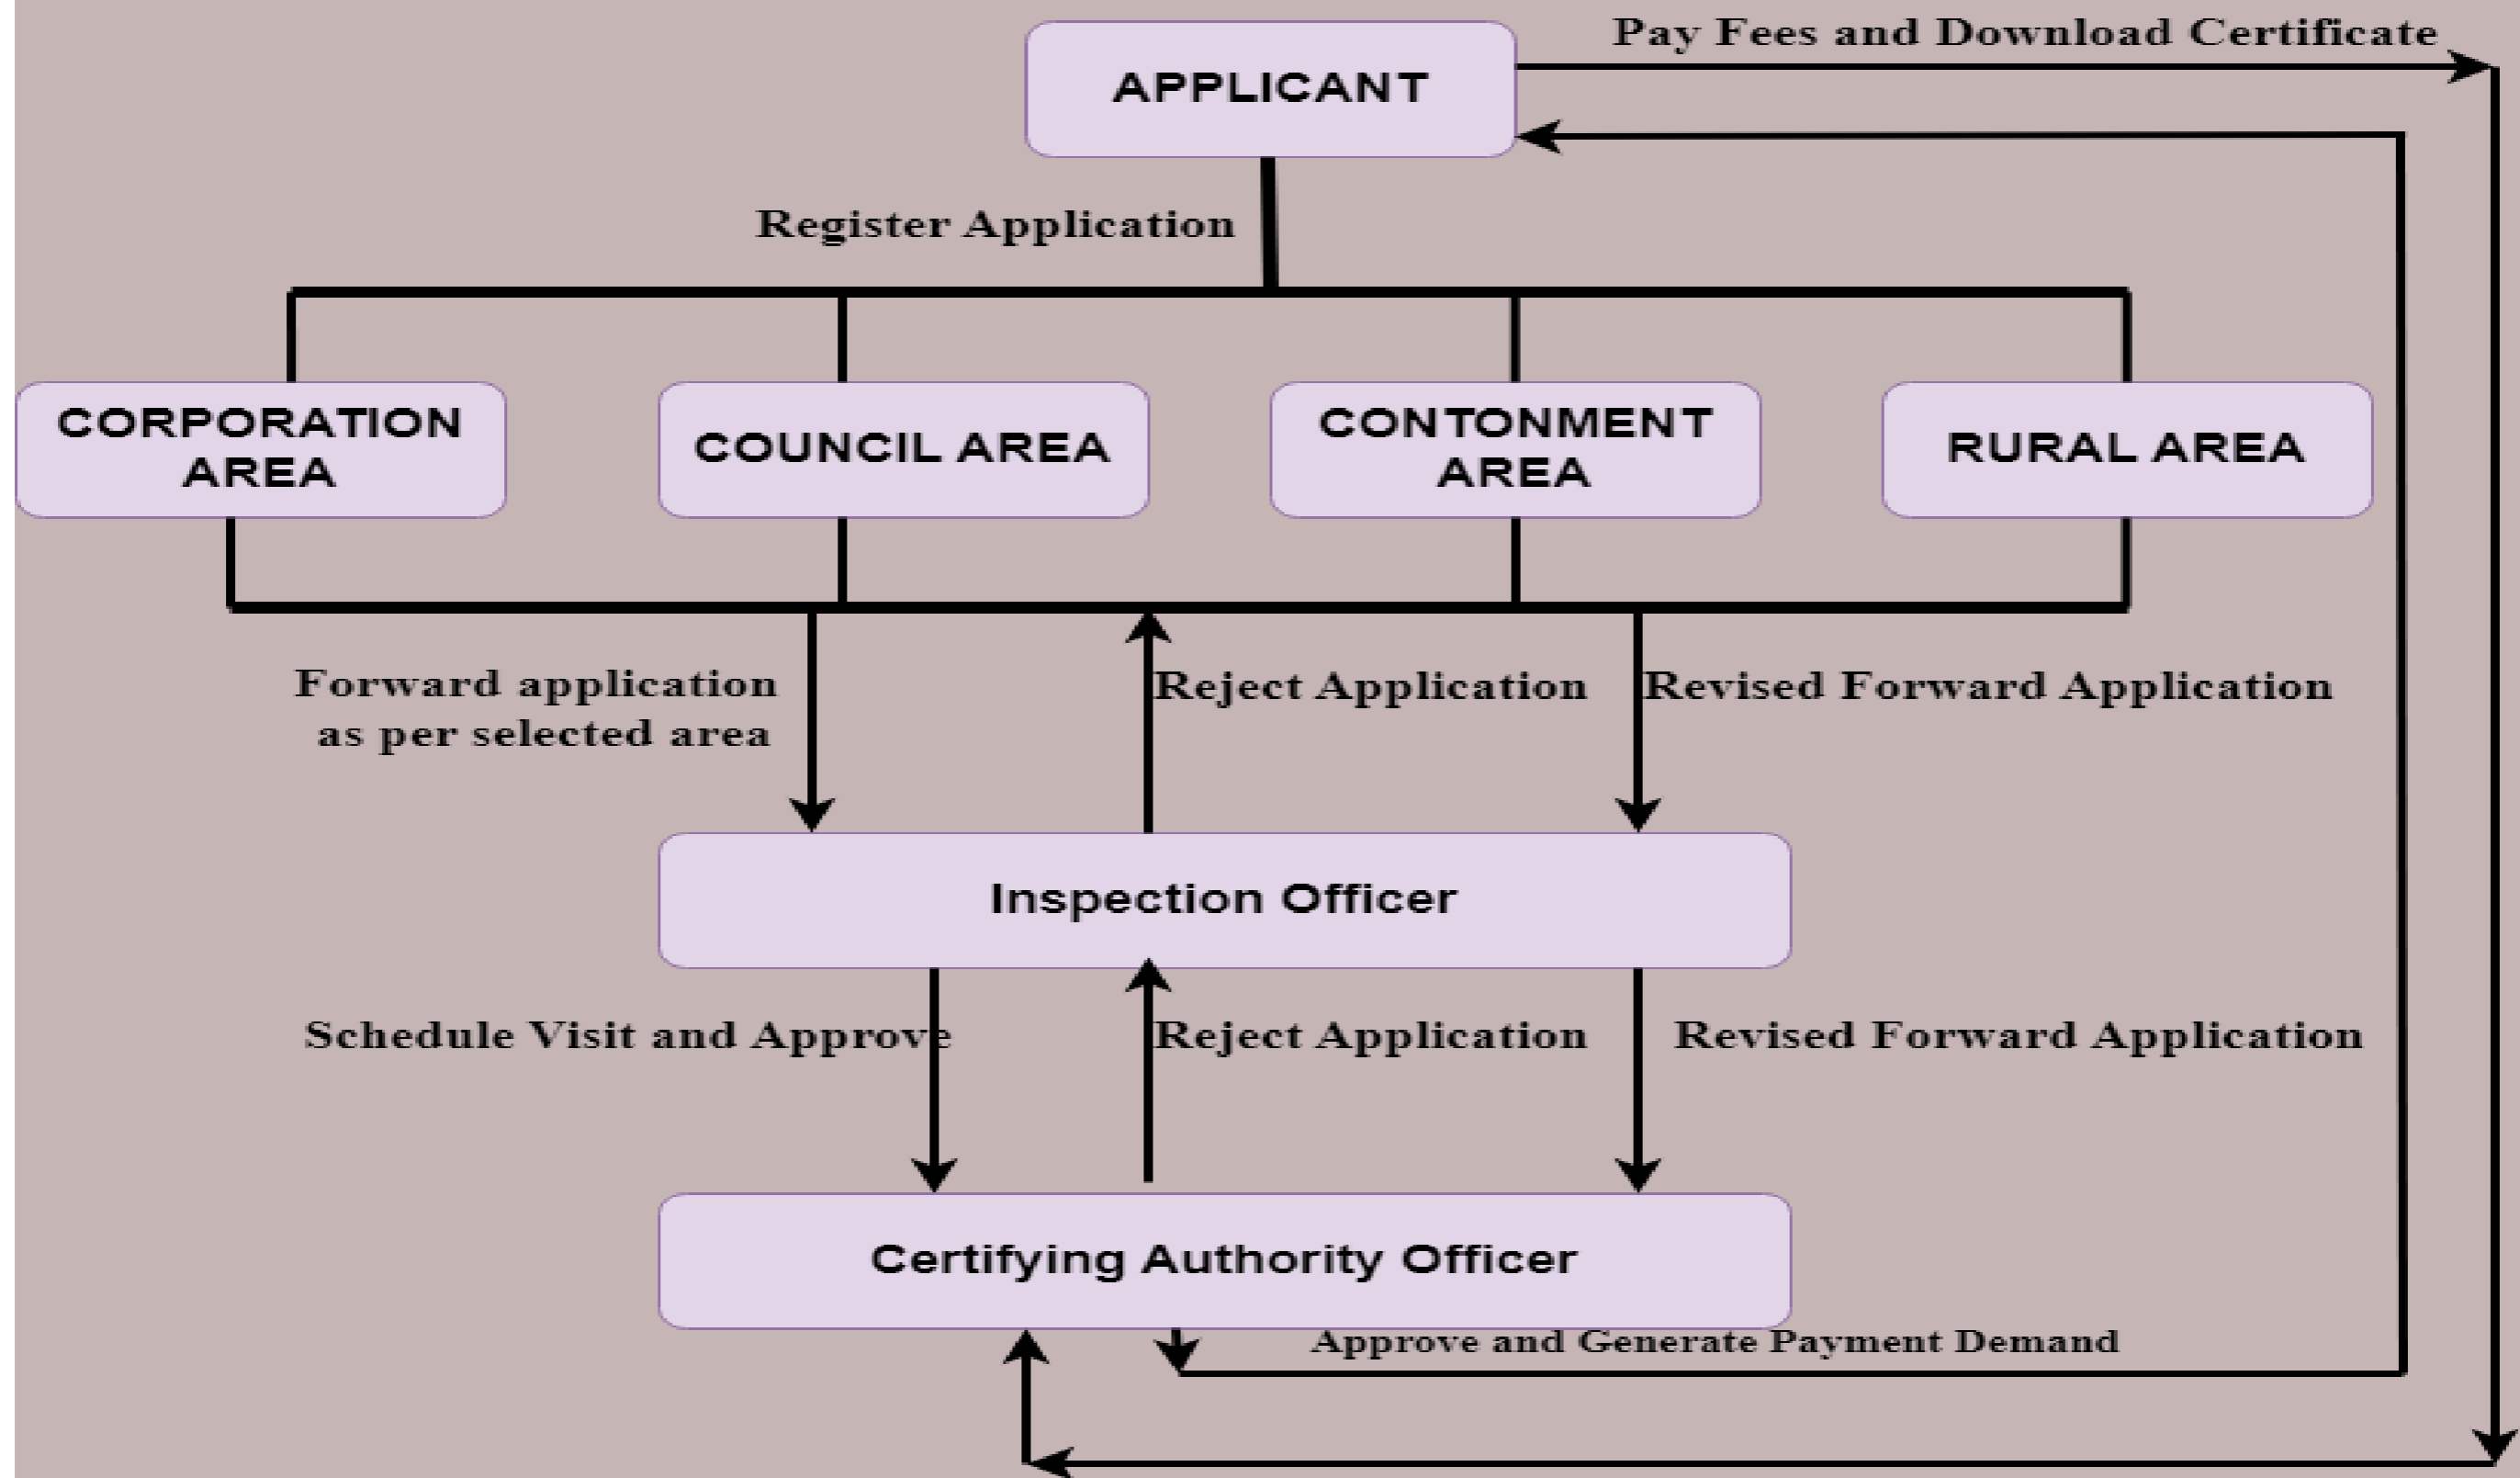

Payment Processing: The certifying authorities verify the application and, upon approval, generate a payment demand within the applicant's login. The applicant receives notification of the payment requirement, and once the payment is successfully completed, the system generates the necessary certificate, accessible through the applicant's login.

Our application serves as an indispensable tool for simplifying the nursing home registration process, enhancing efficiency, and ensuring compliance with relevant regulations, ultimately contributing to the seamless operation of healthcare establishments.

Proposed Users

Sr. No	Area Type	Inspection Authority	Certifying Authority
1.	Municipal Corporation	Additional Medical Officer Health	Medical Officer Health
2.	Municipal Council	Additional Civil Surgeon	Civil Surgeon
3.	Cantonment Area	Additional Medical Officer	Medical Officer
4.	Rural Area	Additional District Health Officer	District Health Officer
